DOMESTIC WIRED OR WIRE FREE SYSTEMS

Dear Prospective Customer

Thank you for your enquiry relating to the installation of an Electronic Intruder Alarm system to protect your premises. We would like a few minutes to explain who Cobra Security Systems Ltd are and how we can help protect you and your property.

Cobra Security Systems Ltd was first registered as a limited company in 1978 and over the last 41 years we have strived to offer a very high standard of workmanship and equipment using Wired and Wire Free Systems at an economical price with an inclusive 12 month 24 hour a day Service Contract which is renewable on an annual basis if required. [Some companies will tie you to an expensive 3 or 5 Year contract].

In 1989 we achieved recognition to the National Approval Council for Security Systems [NACOSS] Roll of Approved Installers [now [NSI] National Security Inspectorate] to which we have Gold Accreditation]; a letter explaining their function as an independent inspection body is attached.

In 1994 we achieved recognition for British Standard 5750 ISO 9002 which is a much coveted Award for Quality Assurance, of not only the way we install systems but in the way we manage staff security, screening and training, eliminating false alarms, maintaining up to date records of every system and their security, in fact every aspect of our company.

The attached examples are in accordance with PD6662 2017 which is the UK implementation of prEN50131 and the National Security Inspectorates [NSI] Code of Practice plus BS8243:2010 if linked to Central Station. The systems include two passive infra red movement detectors [Pet immune available at extra cost] which will, if positioned correctly detect an intruder trying to enter any part of an area either through windows or doors. A personal attack facility which is operational whether the system is set or not and a Magnetic Contact on the Entry/Exit Door which allows you a time delay to arm or disarm the system without annoying your neighbours, Electronic Vibration/shock detectors are also available if required.

Page1 of 12

The **Risco Compact IP** has thirty wire free Zones with built in Digital Keypad, mains operated 12-14 VDC PSU with standby battery capability for a minimum of 12 hours operation, built in entry exit timer indicated by low tone sounder, automatic bell stop timer with rearm facility, 24 hour anti tamper protection, **has built in Wi-Fi** connection to your router for notifications and allows for full control of the system via an APP.

The **Risco Agility 3 and Visonic Powermaster** Systems have the facility for Thirty Two Wire Free Devices, plus a **Wire Free External Sounder**, they also include a built in Speech Dialler which will automatically contact up to 4 people of your choice via a land line and give a voice message informing them of any alarm activations, you then have the facility to phone the premises back and listen in, and even speak to people in the premises, remote arm/disarm of the system is also possible, or an **IP module** can be fitted this will then give you the facility to receive alerts on any Smart phone or device, you can then also control the system using a free **App** on your smart phone or device, you will also have the facility to receive pictures from **PIR/CAMS** if fitted to the system, you can then also view them live at any time, all images are then stored remotely on the **Risco Cloud**.

The Risco **LightSYS** Control Panel has the facility for Eight to thirty two Wired or Wire Free Devices and the facility to add a Speech Dialler or **IP module** Which will then give you the facility to receive alerts on any Smart phone or device, you can then also control the system using a free **App** on your smart phone or device.

Alternatively any of the above Systems can be linked to our Central Monitoring Station, your system is then monitored 24 hours a day and should your alarm system activate, they will contact you directly or any other nominated keyholders should you not be available.

If you also require a POLICE response (additional charges apply) any sequentially confirmed alarms can be passed to the police for them to attend. Personal attack signals at present do not have to be confirmed and should receive an immediate response.

If the option of linking your system to our 24 hour Central Station is chosen there are safeguards to you making an error whereby you can contact Central Station on a special abort telephone number to cancel a call providing you have your Password. Please note all Central Stations alarms requiring a Police response have to be armed and disarmed by Proximity Tags to conform with BS8243:2010.

Sequential Confirmation for system requiring a Police response

A 'Sequentially Confirmed' intruder system is designed such that an intruder must activate two independent detection devices within 60 minutes of each other. The reason sequential confirmation is required by the police is that they believe there is a strong possibility of a genuine intrusion if two detectors have activated.

We have designed the system so that an intruder has to activate a perimeter detector first, and any further movement into the premises will activate a second detector. This design is intended to minimise any potential loss.

Our Alarm Receiving Centre (ARC) will action the alarms as follows:
The first activation is classed as an 'unconfirmed' alarm and only the key holder will be notified.

A second activation from a different detector received within the next 60 minute period will action a Police response, if no second signal is received within this time window the system will automatically be re-instated to its full operational state provided the circuit that caused the activation has reset and is not still in an alarm condition.

However if the offending circuit remains in an alarmed state it will automatically be isolated and the remaining circuits only reset, the system will then send a signal to our Alarm Receiving Centre who will inform the key holders that a zone has been isolated and they should attend site to investigate the cause.

Should our Alarm Receiving Centre receive a mis-operation (abort) or unset signal within the specified alarm filtering delay period they will cancel the alarm and regard the activation as a false alert.

Setting and unsetting of the system will be actioned by using a Proximity Tag
BS8243:2010 clause 6.4.5 [Supplied with Four Proximity Tags]

Final setting of the system to be achieved by closing of the final exit door
BS8243:2010 sub clause 6.3 option C.

As your alarm system is linked to a central monitoring station and [subject to any verification routines] alarm signals generated by your alarm system will be relayed to the Police using confirmed technology signaling. We would point out, however, that if the Police receive an excessive number of false alarms this could result in them withdrawing their response to signals originating from your alarm system. This would leave you without the benefit of signaling to the Police.

Customers are advised that European standards for Intruder and Hold-up Alarm systems specify FOUR grades of system. Each is intended to address an assessed level of risk as follows:

- Grade 1 - Lowest risk
 - Grade 2 - Low to medium risk
 - Grade 3 - Medium to high risk
 - Grade 4 - Highest risk
-
- Option - Audible only or Speech Dialer
 - Option - **Single path** Communicator to Central Station
 - Option - **Dual Path** Communicator to Central Station

The examples attached all come with a **LIVE** internal and **external** sounder; you then have the option for the system to communicate with you or Central station, using either a land line or a GSM dialler at an additional cost.

The following system prices include the first 12 months 24 hour call out cover and Monitoring charges where applicable, renewable at the end of this period if you require at the following costs.

Audible only and speech dialer systems	£ 80.00 + Vat
IP Systems	£ 95.00 + Vat
Central Station Monitored (keyholder only)	£120.00 +Vat
Central Station Monitored (keyholder + POLICE)	£160.00 +Vat
Dualcom DigiAir (with or without POLICE response)	£220.00 + Vat
Dual path Red care (with or without POLICE response)	£295.00 + Vat

There are **No Monthly or quarterly charges.**

There are **No lengthy contracts.**

There are **No hidden charges such as Premium rate contact numbers.**

Alternatively if you do not require a contract our Engineers will still try to assist you over the phone, then if you still need a visit you can pay for a one of call out as and when you need us.

Cost of additional detectors if required

Wire free Pet Immune PIRs	£80.00 Inc Vat
Wire Free Door contact transmitters	£80.00 Inc Vat
Wire Free Shock/impact detectors	£95.00 Inc Vat
4 or 2 Button hand held remotes	£49.00 Inc Vat

HOME SECURITY THAT YOU CONTROL

CommPact, named for its streamlined, space-saving design, offers cost effective security and connectivity, with all the essential functions of wirefree technology available in one small high-powered package.

The simple wireless installation and advanced remote management capabilities of CommPact provide an ideal value-for-money solution, which allows users to enjoy a complete sense of control and peace of mind.

CommPact's remote management is driven by the ELAS (Electronics-Line Application Server), which enables full system control of the premises. The advanced features include remote programming and maintenance of the CommPact system by Internet or smartphone, built-in PSTN/GSM/GPRS communication modules, configuration of email and SMS event notification to users, and stand-alone two-way audio capability.

Wirefree Keypad

- Numeric keypad
- One-touch full/part/perimeter set/unset
- Panic alarm function

Complete control

Being far, feeling close

Comprehensive remote management via web user interface and APP for Smartphones, for convenient system control including:

- Remote system setting for Partial or Full Setting
- Switching the on-board output for activating and deactivating another device
- Managing users and codes
- Change Zone Labels
- Defining alert settings for E-mailing or SMS-ing family or friends in the event of an activation
- Omit and Enable zones
- Event logs management
- Log in and out of Multiple panels
- iPhone, iPad and Android supported
- This Web access is free

Carbon Monoxide Detector

- 3 way LED status indication
- Detector test function
- Alarm hush function
- Quick release back plate
- Internal 85db siren

Gas Detector

- Detects Butane, Propane and Methane (natural gas)
- 85 dB siren output
- Fully supervised device
- Test button and continuous self-testing function
- 220V AC

Range Extender

- Extends the range between control panel and wirefree detection sensors
- Ideal for problematic reception areas; attics, basements and cellars

■ Requires installer keypad for setup order code **INF-PROGKP**

COBRA SECURITY SYSTEMS LTD
WIRE FREE ALARM, AUDIBLE ONLY WITH LIVE EXTERNAL SOUNDER

Control Panel

Risco Compact Thirty wire free Zones with built in Digital Keypad, mains operated 12-14 VDC PSU with standby battery capability for a minimum of 12 hours operation, built in entry exit timer indicated by low tone sounder, automatic bell stop timer with rearm facility, 24 hour anti tamper protection.

Zone One

Entry Exit

One Wire Free Remote Door contact transmitter to be fitted on Front Door.

Zone Two

One pet immune Wire Free passive infra red movement detector having a range capability of 12 metres and an angle of coverage of 90°, protecting Room area, doors and Windows.

Zone Three

One pet immune Wire Free passive infra red movement detector having a range capability of 12 metres and an angle of coverage of 90°, protecting Room area, doors and Windows.

One 4 button hand held Set/Unset + panic button transmitters.

Two proximity setting tags to be supplied

Signalling Devices

Wire Free Self activating sounder with Xenon strobe light incorporating total fail safe 20 minute cut off timer to be fitted at front of building in a prominent position.

One dummy bell box to be fitted at rear of building in a prominent position
108db.internal electronic sounder in main CPU.

Installation of System	£366.67
Plus VAT @ 20%	<u>£ 73.33</u>
Total	<u>£440.00</u>

No Monthly or quarterly charges. No lengthy contracts.

For insurance purposes the system shown above is Grade 1 audible only

COBRA SECURITY SYSTEMS LTD
WIRE FREE ALARM, with IP LIVE EXTERNAL SOUNDER
Giving WiFi connection to your router for notifications and full control of the system via an APP

Control Panel

Risco Compact IP Thirty wire free Zones with built in Digital Keypad, mains operated 12-14 VDC PSU with standby battery capability for a minimum of 12 hours operation, built in entry exit timer indicated by low tone sounder, automatic bell stop timer with rearm facility, 24 hour anti tamper protection, has built in Wi-Fi connection to your router for notifications and full control of the system via an APP

Zone One

Entry Exit

One Wire Free Remote Door contact transmitter to be fitted on Front Door.

Zone Two

One pet immune Wire Free passive infra red movement detector having a range capability of 12 metres and an angle of coverage of 90°, protecting Room area doors and Windows.

Zone Three

One pet immune Wire Free passive infra red movement detector having a range capability of 12 metres and an angle of coverage of 90°, protecting Room area doors and Windows.

One 4 button hand held Set/Unset + panic button transmitters.

Two proximity setting tags to be supplied

Signalling Devices

Wire Free Self activating sounder with Xenon strobe light incorporating total fail safe 20 minute cut off timer to be fitted at front of building in a prominent position.

One dummy bell box to be fitted at rear of building in a prominent position

108db.internal electronic sounder in main CPU.

Installation of IP System	£412.50
Plus VAT @ 20%	<u>£ 82.50</u>
Total	<u>£495.00</u>

No Monthly or quarterly charges. No lengthy contracts.

For insurance purposes the system shown above is Grade 1 Speech Dialer

PowerMaster-GT64

PowerMaster-GT64 Professional Wireless Security and Safety System

PowerMaster GT64 is a professional security system for small to mid-size businesses, light commercial and large residential premises. Using PowerG wireless security technology, it meets the needs of advanced security alarm monitoring applications and heavy-duty operation.

- Fast, easy wireless installations, with prolonged battery life
- Supports all security and safety needs + visual verification
- Very easy to use, with voice and LCD user-interface
- Utilizes smoke detector buzzers for louder alarms
- Works with more than 120 wireless devices, including 32 keypads, 32 keyfobs, 8 sirens, 4 repeaters in 64 zones
- Up to 48 hour back-up battery

VisonicGO
 VisonicGO is the mobile app that gives you peace of mind about your home and business security wherever you are. You can see inside your home or business and make informed decisions about events and notifications, all in real time, from anywhere, via your smartphone or tablet.

PowerMaster-360-R

Modern Wireless Alarm and Home Automation Gateway

Features that Make a Difference:

- EN regulated alarm system
- Modular security and home automation system, supporting:
 - PowerG Technology for security devices
 - Z-Wave radio for home automation devices (optional)
 - Wi-Fi module for IP camera support (optional)
 - Field replaceable 2G/3G cellular module for network communication (optional)
- Professional panel that can be installed out of sight, controlled by wireless devices
- Robust solution with battery and cellular link backup
- Built-in Siren
- Touchscreen keypad
- Accommodates more than 120 wireless devices:
 - Up to 64 zones
 - Up to 10 PIR cameras, 32 keypads, 32 keyfobs, 8 sirens, 4 repeaters
- Extensive range of PowerG peripherals for every application
- Remote configuration and diagnostics with system status indications
- Part of a solution that includes 3rd party cloud-based platform and mobile app

Next Generation Security Panel with Home Automation Capabilities

PowerMaster-360-R is a professional modern wireless security, safety, and control panel with optional home automation capabilities. It is suitable for residential customers and small to mid-size businesses who want a professional alarm and home automation system in a single platform. It provides outstanding wireless functionality with all peripherals.

Using Tyco's award winning PowerG wireless technology, PowerMaster-360-R answers the demands for a professional security system. The combined, optional Z-Wave and Wi-Fi connectivity answers advanced home automation needs.

PowerG Robustness and Reliability

- Frequency Hopping Spread Spectrum (FHSS)
- Highly secured AES-128 encrypted wireless communication – Surpasses the most demanding industry standards
- Huge transmission range of 2000m (6500ft) line of sight* – Covers significantly larger premises than traditional systems, without repeaters
- Full two-way synchronized TDMA wireless network – Provides streamlined communication and improved channel efficiency
- Adaptive transmission power – Saves energy and significantly extends battery life

*Measured line-of-sight transmission range: 2000m (6500ft) at 8m (24ft), 750m (2500ft) at 2m (6.5ft)

No Monthly or quarterly charges. No lengthy contracts.

If POLICE response is required a cheque will also be required to apply for a URN (Unique Reference Number) from your Police Authority, cost **£52.18** for each service required ie PA or Intruder.

Multi-Dimensional Security!

RISCO Group is proud to present Agility™4, a wireless multi layered smart security system, modular and adaptable. With a sleek and new design, Agility™4 is equipped with state-of-the-art outdoors and indoors, wireless visual verification that delivers interactive, automated protection in every way.

Identifying that every home is different and unique is at the core of Agility™4, enabling installers to offer their customers a solution that is ideal to each and every customer. Providing several layers of security allows installers to offer homeowners the perfect solution that matches their needs, their specific home structure and infrastructure, as well as their financial capabilities.

- Advanced Communications capabilities and Enhanced RF Performance: 4G LTE, GPRS and 2GTE cellular, long range, multiple paths communication, for reliability and resiliency, and enhanced radio performance.
- Visual Verification, Indoors & Outdoors: real time event verification, delivered by indoor and new revolutionary outdoor integrated camera detection.
- Smart Security & Safety: integrating smart home devices with remote Cloud based services and intuitive Smartphone App, for a truly enhanced, End-to-End Smart security solution.
- Ultimate Wireless Solution with a new sleek design: Quick, easy and simple installation with remote maintenance capabilities!

Multi-Dimensional Security

Agility™4 provides complete protection against intrusion and safety hazards, indoors and outdoors at every level, addressing every area of the home environments with its unique elements and attributes:

- **INDOORS:** Monitor and control incidents inside the house, whether a break-in or a safety hazard, Agility™4 protects what matters the most.
- **PERIMETER:** Acting to discourage and prevent an intruder from reaching inside, Agility™4 surrounds the house with a tight security layer that keeps the intruder outside.
- **OUTDOORS:** Agility™4 delivers ongoing deterrence, providing early warnings of possible events and threats approaching the household area.

Multi-Dimensional Business Model

Agility™4 is a flexible and adaptable system, and can always be enhanced and modified according to the homeowner's dynamic lifestyle and requirements, providing the professional installer numerous upsell opportunities for their customers' security systems:

- **SECURE:** Protect the house from burglary and theft with Agility™4's State-of-the-Art indoor & outdoor wireless detectors, an array of IP cameras for live video verification, providing unmatched level of security for the entire home environment.
- **SAFE:** Keep family members and home surroundings safe and reduce risks of fire, electrocution and flood, by incorporating Agility™4's innovative safety detectors against hazards such as Flood, Heat & Smoke.
- **SMART:** A truly enhanced security system provides complete peace of mind, efficiency and conveniences, all in one comprehensive solution. By integrating smart home and security & safety devices into automated scenarios, and leveraging RISCO's cloud platform services and mobile application, Agility™4, enhances home security into the ultimate smart, interactive solution.

Integration & Synergy

VUpoint, Live Video Verification

Live Video Alarm Verification, with easy installation, P2P technology and unparalleled level of security & privacy. VUpoint sends immediate notification (snapshots and 30 sec video clip) of triggered events right to your mobile device, keeping you always in control, in real time.

iRISCO

A single intuitive app enables full control of security, safety, and Smart Home features, sending push notifications and images immediately to the smartphone, allowing homeowners to decide the best course of action within seconds. Initiating live video, controlling smart home devices, and managing all system detectors - all with a single click, on one interface.

Smart Home

Combining Smart Home capabilities, with security and safety solutions allowing for automated pre-self-configured scenarios that enhances your home security - such as turning the lights on to dissuade and discourage potential burglars or turning off home appliances to prevent fire hazard.

Cloud

RISCO Cloud VS is a robust revolutionary service and management platform for installation companies, transforming an entire company into a cutting-edge, highly efficient, most productive business operation, increasing profits, and driving business growth. It is a one-stop-shop that delivers the ultimate toolbox helping RISCO installers to define marketing strategy, to establish and maintain a long-term customer base, while providing valuable insights into upsell opportunities, increasing recurring monthly revenue (RMR). RISCO Cloud VS creates a wholesome ecosystem, meticulously designed for RISCO installers.

"Perform any task, in any order, at anytime, anywhere"

COBRA SECURITY SYSTEMS LTD
AGILITY 4 WIRE FREE ALARMS, LIVE EXTERNAL SOUNDER
AUDIBLE ONLY + SPEECH or GSM DIALLER

Specification to supply and install the following Intruder Alarm System conforming to PD6662:2017 which is the UK implementation of prEN50131 and the National Security Inspectorates [NSI] Code of Practice.

Control Panel

Risco Agility 4 with the facility for up to Thirty-two Wire Free Devices plus Wire Free LCD Remote Keypad type "A", up to 15 User Codes, 300 Event Memory, with standby battery capability for a minimum of 12 hours operation built in Speech Dialer with dial back facility using a land line, (or by adding a GSM dialer additional costs apply) the system also has the facility to be connected to your router and then the **Risco Cloud**, the system then sends **email alerts** to any **Smartphone** Via a **FREE App**, this allows you to set/and unset plus control the system remotely, if Eyewave **CampIRs** are fitted you can also **view still images** inside your home

Zone One

Entry Exit

One Wire Free Remote Door contact transmitter to be fitted on Front Door.

Zone Two

One Wire Free passive infra red movement detector having a range capability of 12 metres and an angle of coverage of 90°, protecting Room and Windows.

LightSYS™2

Flexible Hybrid System

Offering Appsolute Protection

LightSYS™2 is the only hybrid security system that offers Smartphone App control and communication flexibility as well as your choice of wired, 2-way wireless, or RISCO Bus detectors.

- The Smartphone App transforms the security system into an appealing tool for home and small business owners
- 2-way wireless sounders, slim keypads and detectors ease your installation and enhance your offering
- RISCO Bus saves you cabling and labour costs and enables remote service, as detectors are installed in series on the system Bus and can be remotely configured and diagnosed
- Communication flexibility includes IP, GSM/GPRS, PSTN and STU Adaptor, all installed within the main housing

Professional installation and monitoring station companies around the globe choose LightSYS™2 for their small commercial and residential installations.
